VobBlanker

VobBlanker comes to the rescue every time you deal with problems regarding the shrinking of DVD-9 down to DVD-5 by entirely eliminating specific VOB contents. While some other software may help you overcome obstacles, such as DVD Shrink does, VobBlanker can prove to be the best companion for the aforementioned application. DVD Shrink is not a perfect program, as it always resorts to compressing the video stream of the main movie in order to make it fit the destination DVD-5 format. With VobBlanker, you can strip down your DVDs from unwanted content and then use DVD Shrink to burn your backup disc in Full Disc Mode, thus not tampering with the quality of the source video stream. The Video Title Sets (VTS) existing on a DVD disc containing one or more PGCs (Title Program Chains). Furthermore, a VTS can have a menu that is composed by Menu Program Chains. Titles are grouped into collections named VTS and all of them must present the same video attributes, while all Menu PGCs are in the same situation. VobBlanker aids you by providing the capabilities for blanking, replacing, cutting and stripping video titles. In order for VobBlanker to properly work, you have to deliver an unencrypted backup of the DVD to be processed. The IFO files of the DVD disc provide access to the cells within the VOBs and the application makes use of that to quickly and easily handle the PGCs. By removing all the unnecessary features of your DVD backups, you are saving a great deal of space and every little bit matters because it can make the difference between a compressed main title also known as a low-quality output and an uncompressed main title which means crisp graphics and smooth sound. VobBlanker is not just a great companion for software such as DVD Shrink, or an intermediate app from rippers to burners. VobBlanker, from a professional point of view, is awesome, all by itself. The fact that it works wonders when added to an arsenal of DVD copying tools makes it a core component and that just cannot be overlooked for too long.
