can be used to test your MPEG-4  
files, output into two formats, an  
ISO one which can be played back  
in most DVD players, and another  
more compatible with a web  
browser, thus making it easier for  
you to distribute your files. Up to  
now, polyolefin resins (e.g.,  
polypropylene, polyethylene and  
the like) which have a high  
molecular weight have been

---

widely used as plastics or film materials, but have been expensive. In addition, when a large amount of a plasticizer (e.g., dioctyl phthalate, dibutyl phthalate, tricresyl phosphate, triethyleneglycol dibenzoate, bis(2-ethylhexyl) phthalate and the like) is added as an effective plasticizer to a resin, the
