**Solidworks 2013 Sp4**

---

September 12, 2013 - I'm trying to install Solidworks 2013-2014 SP4.0 from an administrative image created with the SolidWorks Installation Manager. When installing the program, a dialog appears that says "Solidworks 2013 x64 could not be installed because it is outdated and cannot be used to run this system. Contact the software vendor to update the software if necessary." I have already checked and updated my digital serial number and I get this every time I start Solidworks. I can't upgrade because it's not supported and I have a free version license.
