What's New in the CryptoLicensing For MFC?

CryptoLicensing for MFC software is a solution for easy licensing of software that is created with MFC. The license can be either added to the software you want to protect, or to an existing software already protected with a license. It can easily be added to existing software by dragging the *.lic file to the Program's Tool menu. You can be absolutely sure that the license is fine and legal because it's made by CryptoLicensing For MFC so you don't have to worry about the legality. If you want to protect your software from various persons, CryptoLicensing For MFC can easily secure your app with a licensing profile. Also you can buy additional functions from me. For more details, please check the product page. Thank you. CryptoLicensing for MFC is a powerful software for licensing and protecting software applications developed with Microsoft Foundation Class (MFC) or for any other tool. It works with the.lic and.licx file extensions. CryptoLicensing for MFC can add a copyright, license key, expiry date, icons or any other required data to the Software to be protected. It allows for the specification of the required copyright message, the expiration date, a copyright notice and a license key, and also to add and activate/deactivate a registration code to a protected software. CryptoLicensing for MFC can create registration codes and distribute them to thousands of end users and re-activate each user's computer with a registration code. It can modify and protect almost any software application, including: Win32 software application, installer, Visual C++ wizard and application or any other application tool developed with MFC, VC++ ATL or C++. CryptoLicensing for MFC can be used by businesses, individuals or professional developers who want to license and protect their application tools. Product Features It can make a copy of the software protected and protect multiple software applications. It can add a copyright to any software application, or an additional copyright to already protected software. It can add a key, expiry date, icons and a message. It can also assign a Registration Code to the software application. It can send the Registration Code to thousands of users by sending a CD, CD-ROM or by email. It can deactivate the Registration Code and remove all the information added to the software application. It can activate the Registration Code on the user

System Requirements:

The game works on most recent systems. It is recommended that you have a high-end gaming PC with at least an Intel i5 (or equivalent), and 8 GB of RAM and a fast graphics card. A modern computer running at least Windows 8, is required. The game is made available through Steam. It is advisable to have a Steam account to play the game. In addition to other features, Steam provides a game library. You can add the game to your library and keep it available for later download. The game is also available on most major consoles.
