Romelu Lukaku has become Manchester United's second goalscorer of the season in the Premier League. Romelu Lukaku is a welcome surprise for Manchester United boss Jose Mourinho. After a season of mediocrity, the Belgian international's performance in five Premier League games has all the hallmarks of an explosive, world-class striker. After watching him score against Sunderland, West Ham and Bournemouth in United's first two games of the season, Mourinho described Lukaku as "the best player" after his club thrashed Southampton. Unperturbed by the derisive chants directed at him in the wake of those decisions - some have compared him to Luis Suarez - Lukaku appears to have matured into the best centre forward in the Premier League. Lukaku as a 21-year-old at Sevilla. At 21 years old, Lukaku was struggling to nail down a starting place for Sevilla - a club he had joined in January 2012. A lack of playing time and criticism during what he described as a "fantastic" season at West Bromwich Albion suggested that his days at the club were numbered. He then found himself on the bench for Antonio Conte's title-winning Chelsea team. Although the Uruguayan's playing style was not to Lukaku's taste - and he probably should have become the 'Diego Maradona' of English football - it seemed that he was a player Chelsea were prepared to keep. During that season, Mourinho said Lukaku was "the best player in Spain". Jose Mourinho has seen the best of Lukaku. From that, he was sent to Belgium on loan - with the option of a permanent transfer. Lukaku, his girlfriend Sofia and their child were supposed to move to the Belgian club, but instead opted to stay in London. "It was a bad decision," he admits now. "I was away from my family too long. It was not good for me or for the baby." He initially returned to his former club, Nice, on loan in January 2014 but spent just six months there before joining Chelsea again - although he was on the bench for Saturday's Carabao Cup semi-final defeat to Manchester City. His form is welcome at Manchester United. Speaking to France Football, he said: "I realised that I needed to focus on becoming a better player, so I left Chelsea and signed for Nice. I

Q: Android RichTextEditor Issue I have this Activity which uses the Android RichTextEditor to display a simple string. It works fine on every device I've tested except for (at the time of this posting) one Nexus 7 tablet (that I had to run with 4.1). When it displays, the editor begins at the top left of the screen and when the user types it scrolls right just fine. As the user continues to type it scrolls off the bottom right of the screen. I have no idea why this is happening, but I have yet to find someone else with this problem. My code is as follows: `edtMessage.addTextChangedListener(new TextWatcher() { @Override public void onTextChanged(CharSequence s, int start, int before, int count) { // TODO Auto-generated method stub Log.d("TEST", "onTextChanged Method"); } } }` My XML is as follows:
