Unfortunately, much of what has been released tends to be heavy on the artificiality, thus the artiste likely would rather name their style art. However, for those looking for more than just mere propaganda, we bring you the latest, genuinely hand-drawn, technique in mental liberation, Liberating Personal Handwriting By Pious Talent. A Freedom to Write Writing your thoughts down is a bit like a child that endlessly refuses to put down the sticks and stones of the sidewalk. It's a huge itch, a compulsion, a habit. But you don't need to psychoanalyze yourself, because the author, most likely, does the same thing. With Liberating Personal Handwriting By Pious Talent, you have the ability to let go of your writing inhibitions. It's not me, it's you. It's you, but it's also the right part of you, not a tick on your ass. Authority Over Thought Not only is it a freeing technique, but it allows for an act of destruction of thoughts that could stop you cold

Q: Setting up the mySql Dump generator I'm trying to setup mySql dump (forge) from the example table... but I'm having trouble. The example table is created like so in the create.sql file under section called CREATE TABLE, there is a line like this : insert into chats (id,chat_text) values (null,'bla bla bla...'); For some reason, this causes an error when I execute the create.sql file, saying: You have an error in your SQL syntax; check the manual that corresponds to your MySQL server version for the right syntax to use near 'insert into chats (id,chat_text) values (null, 'bla bla bla...'' If I remove the insert statement, creation is all right, but I would like to generate the dump in a suitable fashion, cause my set-up is running fine, I just havent got dumps for it yet, cause I use the database without database tool. Is there a proper way to do this? I'm using Mac pro
