Players can also more clearly see where the ball is going and respond instantly. On-pitch Awareness Players can now play with greater anticipation to make decisions around the play and gain advantage. FIFA recognizes player eye contact to predict what might be happening next, even if it is not the ball. New Player Intelligence The DIS now also improves Dribbling Intelligence, further enhancing the user experience of on-pitch awareness. For example, the user can predict where the ball is going and play off of a real-life concept of vision.
