1. choose a character (class) 2. choose a race (see list) 3. choose a mask (see list) 4. select what "type" of game you want - demo - mod - level 5. name your game 6. submit...Wow, I haven't been on here in a while. My husband recently started gaming for the first time in years, and he's been adding to his collection, so I decided to join him. He's starting off pretty slowly, so he's grabbing games at a reduced rate. I actually started a few nights ago with some of my action figure collection, so they are sort of in the beginning. I'm gonna start off with a list of games I'm either interested in or know a lot about, then see if I like the gaming style that he plays. I own all the original DS games, AdventureQuest Worlds, Angelique, Aquanaut's Holiday, Aquanaut's Holiday 2, The Last Airbender, Assassin's Creed 1-3, and Shadow of the Colossus. (I personally liked Shadow of the Colossus best). I also own my own portable Nintendo DS as well. My husband also games on the original Gameboy and Gameboy Advance, but I still own them as well. I like to game on my DS, PSP, and my laptop as well. I also have my old PC with LAN support for board games. I can't stand playing on my laptop for more than an hour or so, but my husband plays a lot longer, so it's perfect. I like so far, Bioshock 2 and 3, and I've heard really good things about Borderlands, so I'm going to get those on my list. Add GOG.com to that list of video games. When I was in HS, my dad got me a GOG.com account, and I got PlanetSide and another obscure title from them. I miss my old account, but I'm surprised that it hasn't been closed. \_\_\_\_\_ What do the vultures have to do with my writing? Bite the heads off tramps. Add GOG.com to that list of video games. When I was in HS, my dad got me a GOG.com account, and I got PlanetSide and another obscure title from them. I miss my old account, but I'm surprised that it hasn't been closed. Get it back up

## What's new in Fm45's Sprite Man Adventures:

2 was released with Ori and the Blind Forest. Sadly, the publisher said that it was launching on the Game Boy Color not long after having the 3DS/Wii U and 3DS versions, which was a pretty big mistake in the gaming community's eyes. While I do understand why Skull Ball Heroes 2 was only made for Game Boy Color because of its 8 bit design style, it pains me to see the game be largely forgotten given that it was an excellent entry in the Skull Ball series, as well as a great game that should be released on current platforms as well. From the beginning, there was no doubt that Skull Ball Heroes 2 was going to be a good game. Skull Ball Heroes 1 tried to retell the story of the original game, Skull Ball Heroes 2 tried to be more like a sports game than a rogue-like. While some critics and fans have said that it barely resembled the original, that doesn't change the fact that it was still in the vein of the original game. Imagineering, the studio that creates the Ori and the Blind Forest cartoon for Netflix has done an amazing job making Skull Ball Heroes 2 look and feel just like the original game. Skull Ball Heroes 1 wasn't bad and did a really good job of making sure the story of the original game was told again, but it could have been improved. Skull Ball Heroes 2 takes the original game further and it does this without losing its own identity. What this means is that instead of making a new world with new characters to tell your own story, the story was continuous to the original which is nice. You play as the same character as the original, Ori, and as many of the other characters from Skull Ball Heroes, Radit, Pulqualge, Heisu, Misoso and Lakna. Together they're searching the world for six crystals of powers to save everyone from something called The Nightmare from way back in Skull Ball Heroes 1. When they first showed Skull Ball Heroes 2 to the press prior to its release, Activision was oddly very excited to see the 3DS version, which was unheard of. The original Skull Ball Heroes was only released for the Wii U and GBC for the

higher name games, but Skull Ball Heroes 2 was actually released on the Nintendo 3DS as well as on the Game Boy Color. Before the game was released, the publisher intended for Skull Ball Heroes 2 to be a new entry in the Skull Ball series but eventually backed out and only released it on the Game Boy Color.

Why do we prefer to use Type classifier over Type variable? I am referring to the one used in the following example : `def classifier(rhs): class Union: def __init__(self, classifier, target): self.classifier = classifier self.target = target def __repr__(self): return "Union(%s, %s)" % (self.classifier, self.target) class ByKey: def __init__(self, classifier, target): self.classifier = classifier self.target = target def __repr__(self): return "ByKey(%s, %s)" % (self.class`
